

# Microsoft for Startups Founders Hub

Microsoft for Startups Founders Hub helps startups radically accelerate innovation by providing free access to industry-leading AI services, expert guidance, and the essential tools to build, grow, and scale.

## Build with Azure

Ship faster with up to \$150k in Azure credits and the tools and discounted access to tech your team needs to build, like GitHub, Microsoft 365, LinkedIn Premium, and more.

## Build the future

Infuse AI into your product with free access to Azure AI Studio — the most comprehensive set of generative AI models, including OpenAI GPT-3.5 Turbo, GPT-4, and Llama 2 by Meta.

## Build with confidence

Solve your startup challenges and grow your network with unlimited 1:1 meetings with experts and engineers from Microsoft.

### Why choose Microsoft AI tools?

#### Computing power:

Microsoft has one of the most powerful supercomputing infrastructures in the cloud, and all our AI tools are Microsoft services.

#### Security:

Training data you provide for your own models is not used to train or improve Microsoft models.

#### Responsibility:

Azure OpenAI Service is a wholly owned Microsoft service protected by one of the most comprehensive compliance and security controls in the industry.

#### Flexibility:

Startups can customize any model with their own data and eliminate complexity without worrying about setting up and managing the GPU infrastructure.

Startups at any stage of development are welcome. If your application is accepted, you'll get credits and benefits for at least one year. And if you need more time, you'll be able to apply for more.

Sign up now to get the support and resources to propel you further.
